RemotePRO Air

With RemotePRO Air, diagnostics becomes an advanced service, capable of generating value before, during and after the intervention.

Not "just" remote diagnostics

Leverage the native connectivity of modern vehicles to offer an innovative, flexible and highly professional service.

Contactless diagnostics, even before the vehicle arrives

RemotePRO Air allows workshops to remotely check the status of a vehicle, even before it physically enters the workshop. Currently available for BMW, Mini and Mercedes-Benz vehicles (with connected vehicle technology), this feature opens up new operational possibilities:

- More accurate planning of repairs and spare parts supply
- Reduction of unnecessary dismantling and extra costs
- Optimization of schedules and resources

Preventive diagnostics for warranty and maintenance contracts

RemotePRO Air allows you to organize repair activities in advance, offering a real competitive advantage:

- New revenue opportunities
- Customer loyalty through proactive service
- Early detection of faults or anomalies

Post-intervention follow-up: quality and loyalty

RemotePRO Air does not stop at the initial diagnosis. After the intervention, it allows you to monitor the status of the vehicle over time, offering:

- Loyalty strategies based on continuous monitoring
- Greater quality assurance
- Fewer complaints and returns to the workshop
- Timely interventions without calling the customer back
- The ability to offer premium services such as reporting, alerts and preventive maintenance

Flessibilità totale: Model pay-per-use

The RemotePRO Air service is available on a pay-per-use basis, with payment via MAHLE Coin, to ensure maximum flexibility and adaptability to the needs of each workshop.

RemotePRO Air is also perfect for **fleet management**, through remote monitoring of the status of the vehicle fleet and planning of repairs at the optimal times, preventing unexpected downtime.
